MILK PRICE HIGHLIGHTS

Class I prices: Early January prices paid by dealers for milk used for fluid purposes (Class I) averaged \$7.10 per hundredweight for about 150 markets, according to the Crop Reporting Board. This was 1 cent above December 1970 and 18 cents above a year earlier. Regional gains above a year earlier ranged from 7 cents in the Pacific Region to 29 cents in the East South Central Region.

Store milk prices: Store prices to consumers in 25 major cities in early January averaged 57.8 cents per half gallon for the most common grade of milk. This was 0.2 cent above December and 0.9 above a year earlier.

Home-delivered prices: Prices for home-delivered milk averaged 65.6 cents per half gallon in early January for 25 major cities. This price was 0.2 cent above last month and 1.5 cents above January 1970. The home-delivered price represents list prices before deductions for quantity and other discounts.

SALES OF FLUID DAIRY PRODUCTS AND RECEIPTS
OF MILK FROM PRODUCERS

Preliminary November sales: Preliminary data on total sales of fluid dairy products during November 1970 in 60 marketing areas averaged nearly the same as a year earlier. Total sales for the January-November 1970 period were about the same as a year earlier.

October sales: Revised total sales of fluid products for October in 60 regulated markets (55 Federal and 5 States) averaged nearly the same as last year's 3.5 billion pounds.

Whole milk sales in October were down about 2 percent from a year earlier sales of 2.7 billion pounds.

Low-fat and skim milk sales during October were nearly 9 percent above a year earlier sales of 674 million pounds. The cumulative sales this year continued to be up nearly 9 percent from last year.

Milk and cream mixtures sales (mostly half and half) averaged nearly 7 percent below October 1969 sales of 37.6 million pounds. Sweet and sour cream sales were up nearly 2 percent above the 19.9 million pounds for October 1969.

Milk receipts: November receipts of milk from producers at plants regulated for 62 marketing areas (58 Federal and 4 States) were up 3.9 percent from a year earlier. The number of producers delivering milk to plants for these same markets was down nearly 2 percent from November 1969.

Milk production: United States milk production in December was estimated at 9,285 million pounds, 1 percent more than a year earlier. December output provided 1.45 pounds of milk per person for all uses, equal to a year earlier but slightly more than the November supply of 1.43 pounds.

1/ Regional and U.S. average based on prices for individual markets weighted by population. Prices are f.o.b. cities within markets on a 3.5% fat basis. Prices for Federal-order markets include prevailing premiums above minimum Class I prices, reported by principal producers' associations. Premiums may not apply to all Class I milk. Prices in this table do not represent returns to producers. Blend prices paid to producers, based on proportions used in fluid and manufactured products, are shown by markets in Table 6.

2/ Markets located in the New York-New Jersey Federal Order (Middle Atlantic) revised f.o.b. city minimums changed to agree with specified freight zones under the order. East North Central revised to include 26 cent service and freight charges for the Chicago market not previously included.
